Tapestry in the top three for Business Cloud's EdTech 50 ranking

[Tapestry](#), the childhood education platform, has been ranked third in [Business Cloud's EdTech 50](#) which features the leading companies creating original tech to help transform education and workplace development. Selected from the 105-strong shortlist, the final ranking was decided by a combination of public vote and an expert judging panel*.

This is the third year running that Tapestry has been placed in the top three of this influential ranking. In the past year, Tapestry added an array of new features for its nursery management suite which launched in 2024 and is now available to thousands of early years settings.

Tapestry was co-founded by Helen and Steve Edwards in 2012 and together they have constantly strived to ensure it meets the needs of settings, schools and families. In response to the news about the EdTech 50 Steve Edwards said: *"To be in the top three for the third year running is a wonderful endorsement for Tapestry and all our work over the past 13 years. It is a challenging time in education and our customers are dealing with tight funding and resources. As the original, and leading, childhood education platform, we continue to be committed to helping them to reduce costs and enable them to do their work as easily, and as effectively, as possible."*

Jonathan Symcox, editor of BusinessCloud shared the purpose of the rankings:

"This year's EdTech 50 showcases the best of British firms developing technology for the classroom and higher education, as well as professional development in the workplace. It's a privilege to shine a light upon companies of all sizes leading the way via traditional technologies and emerging tech including virtual and mixed reality, artificial intelligence and robotics."

About Business Cloud's EdTech 50

*The [EdTech 50](#) celebrates businesses of all sizes creating original tech to transform education and workplace development. BusinessCloud called on its readers to vote for companies from the 105-strong shortlist over seven days. A combination of these votes and choices from an expert judging panel determined the top 50. The judging panel was comprised of:

- Rachel Vecht, founder, Educating Matters
- Caroline Wright, director general, EdTech Exchange
- Prof Janice Allan, pro-vice chancellor, academic leadership, UCLan
- Jonathan Symcox, editor, BusinessCloud

**About Tapestry**

Tapestry is the original, and leading, childhood education platform, providing an online learning journal, progress monitoring, and a management system for early years settings and primary schools. It helps educators to celebrate children and engage families in mainstream and SEND provision. Tapestry keeps families in touch with how their child is doing, enables educators to build a picture of each child's development and interests, and provides the administrative tools for the daily running of a setting.

Tapestry is used in more than 40 countries, and supports 14,000 schools and settings - more than any other platform. It was launched in 2012 by the edtech company Foundation Stage Forum and is based in Lewes, UK.

Tapestry is the brainchild of husband and wife team, technologist Steve Edwards and educator Dr Helen Edwards. Both regularly write and speak about education and technology, and they continue to support initiatives like the APPG for Childcare and Early Education.

Tapestry has been shortlisted for the Bett Awards and TeachPrimary Awards and has been listed in the top three in Business Cloud's EdTech 50 for the past three years.
